HIGH-SPEED INTERNET SET UP

**for
Windows XP
users**

High-Speed Internet set up for Windows XP users

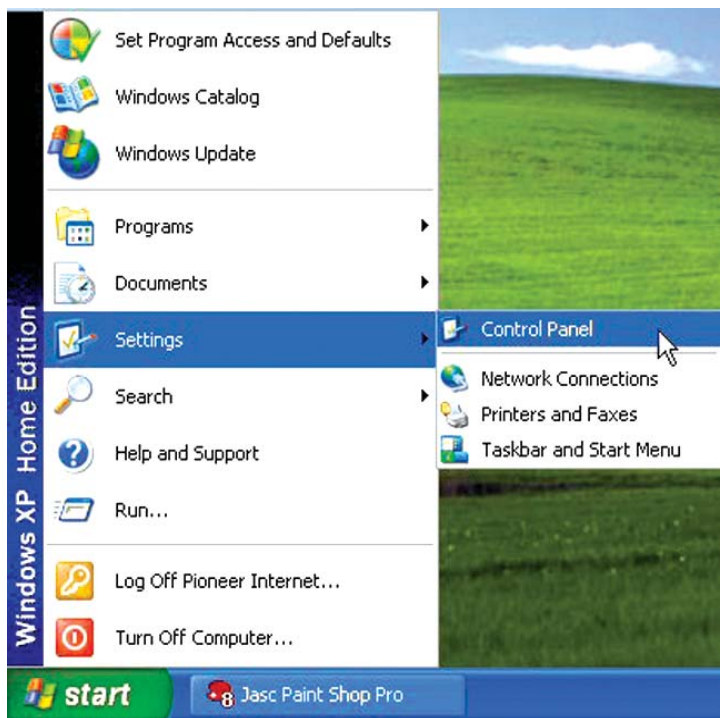

1. To set up a Pioneer High-Speed Internet connection on Windows XP, click **Start**.

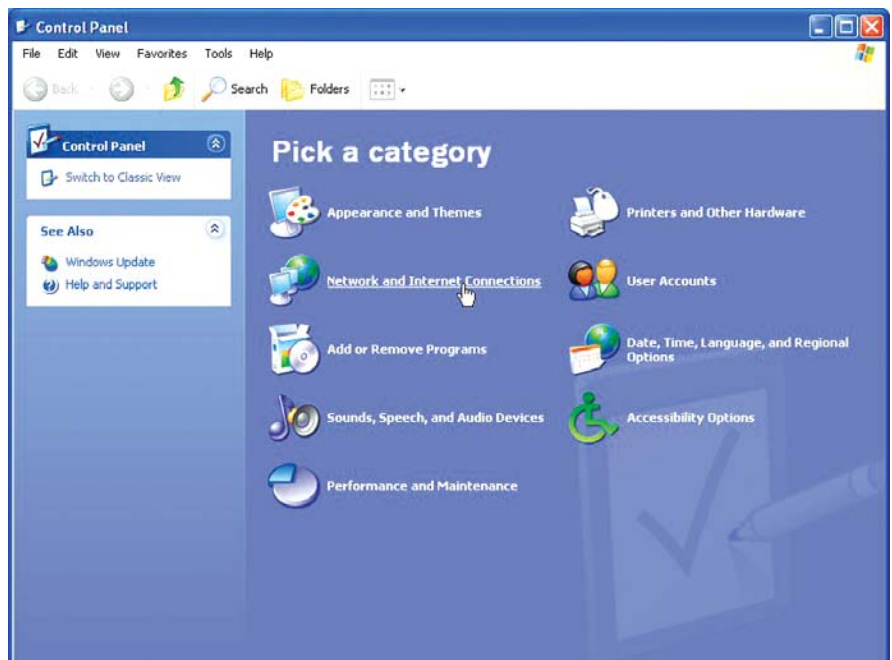

2. There are two different Start menu configuration options:

If the Start menu appears like the one on the left, click on **Control Panel**.

If the Start menu appears like the one on the right, click **Settings**, then **Control Panel**.

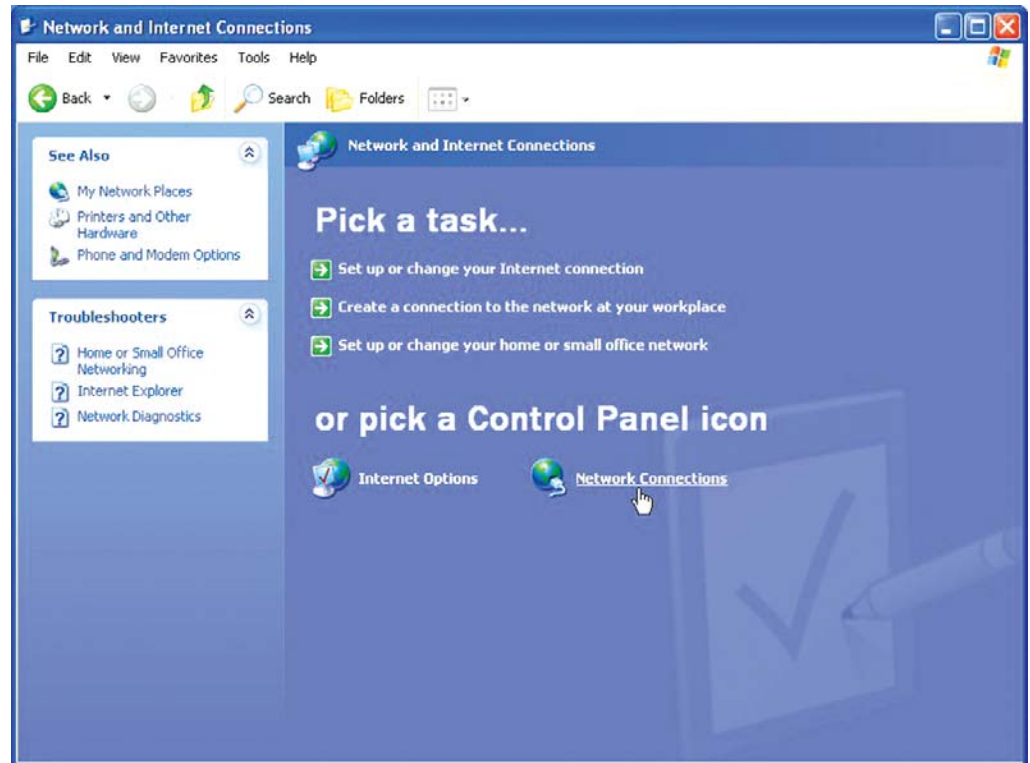

3. In the control panel, click on **Network and Internet Connections**. (Note: Some computer configurations may not show Network and Internet Connections due to the different layout possibilities of the Control Panel. If the Control Panel appears as below, skip step 5. If Network and Internet Connections is not displayed, please skip steps 3 and 4 and proceed to step 5.)

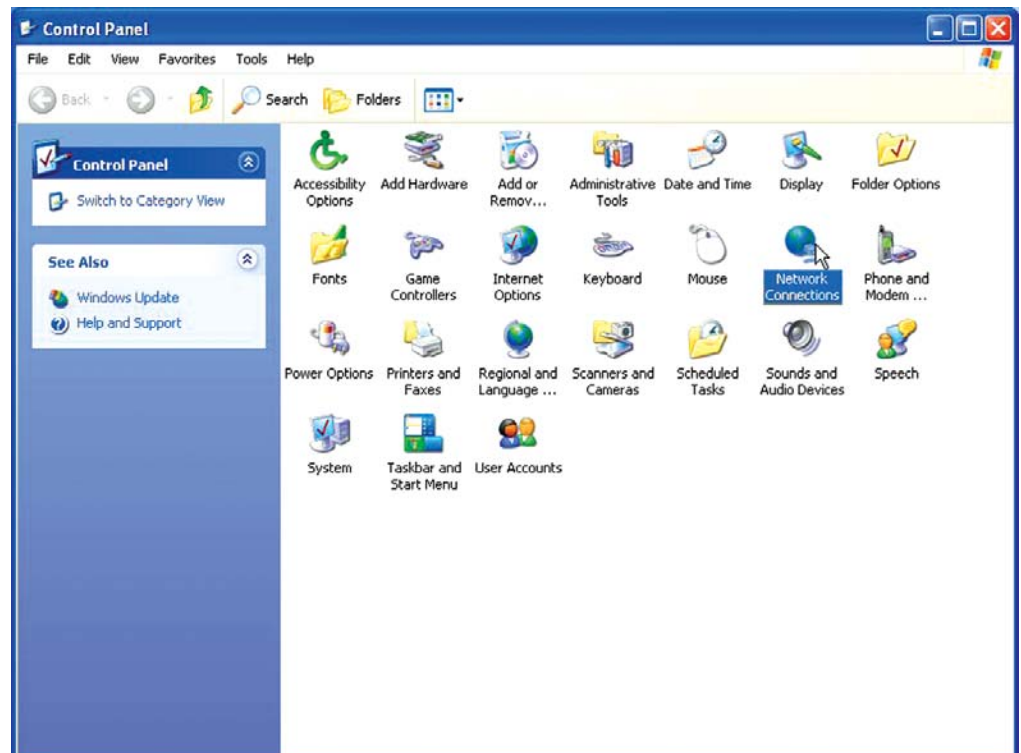

High-Speed Internet set up for Windows XP users

4. Click **Network Connections**.

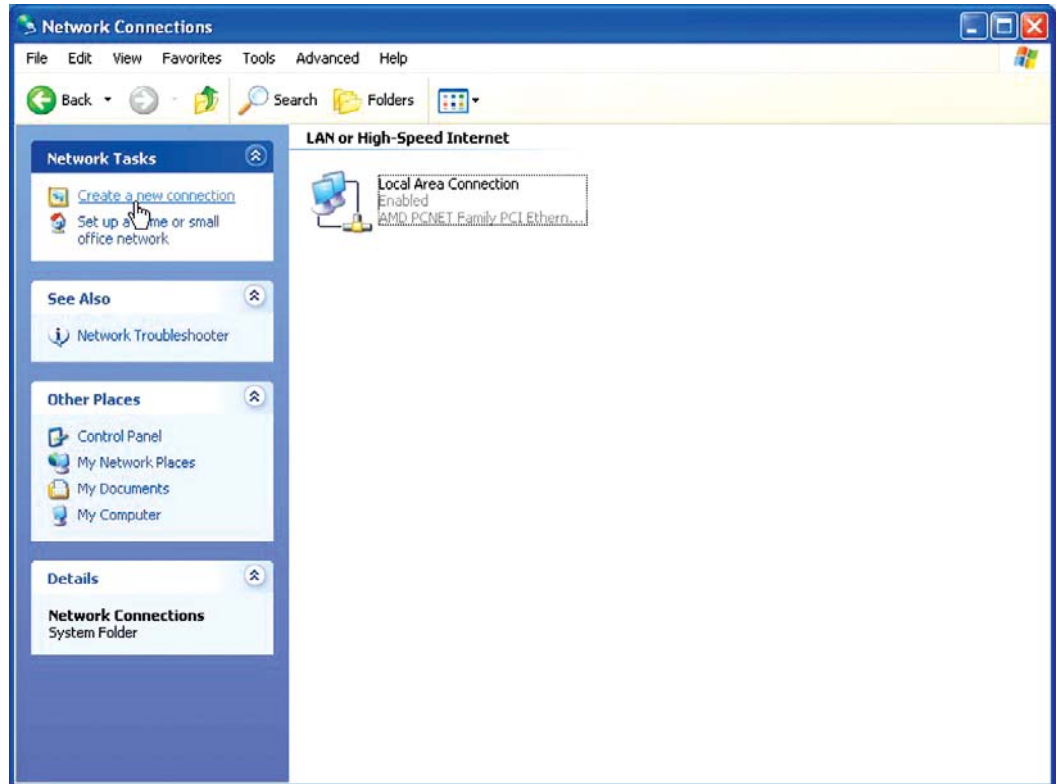

5. This window will only be displayed if the Control Panel is set to display in Classic View. If the Control Panel is displayed as follows double-click **Network Connections**.

High-Speed Internet set up for Windows XP users

6. In Network Connections click on **Create a new connection** listed under Network Tasks.

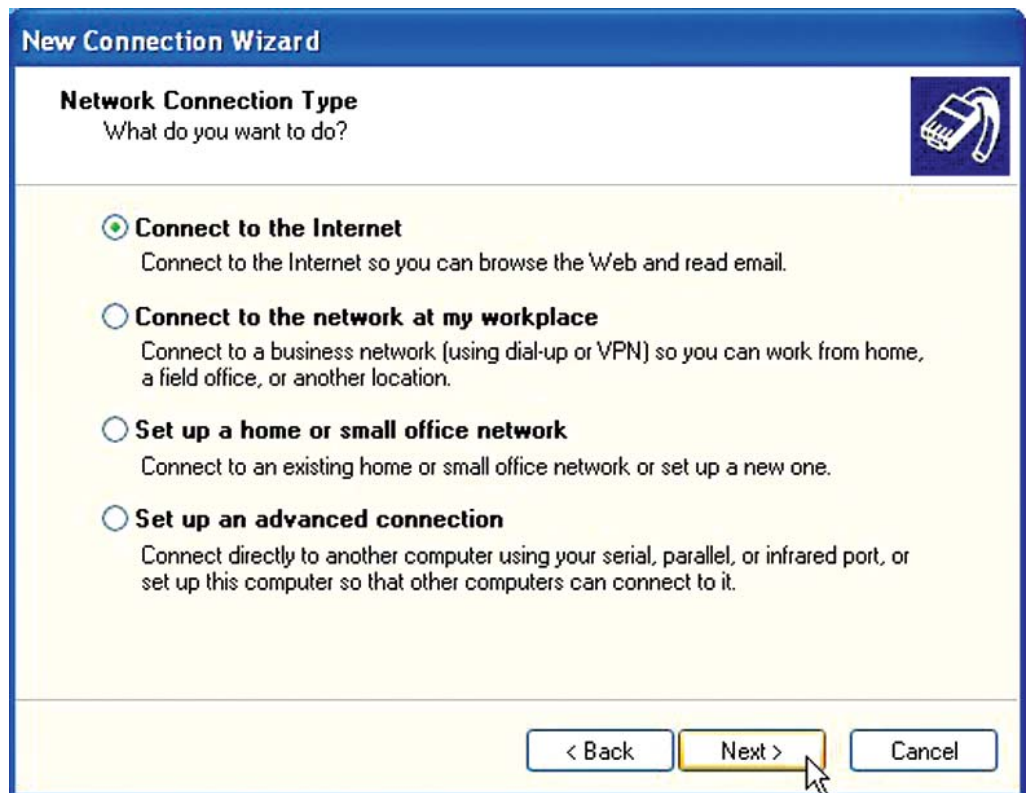

7. When the New Connection Wizard window displays, click Next.

8. On the following screen, verify **Connect to the Internet** is selected and click **Next**.

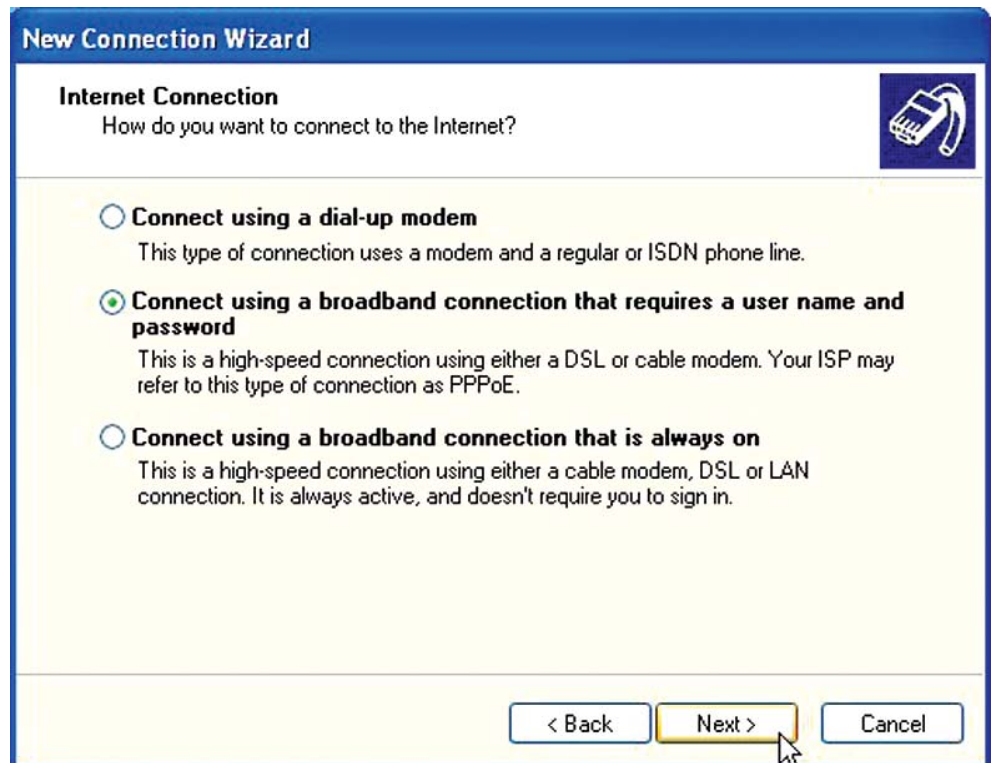

9. On the following screen, select **Set up my connection manually**. Click **Next**.

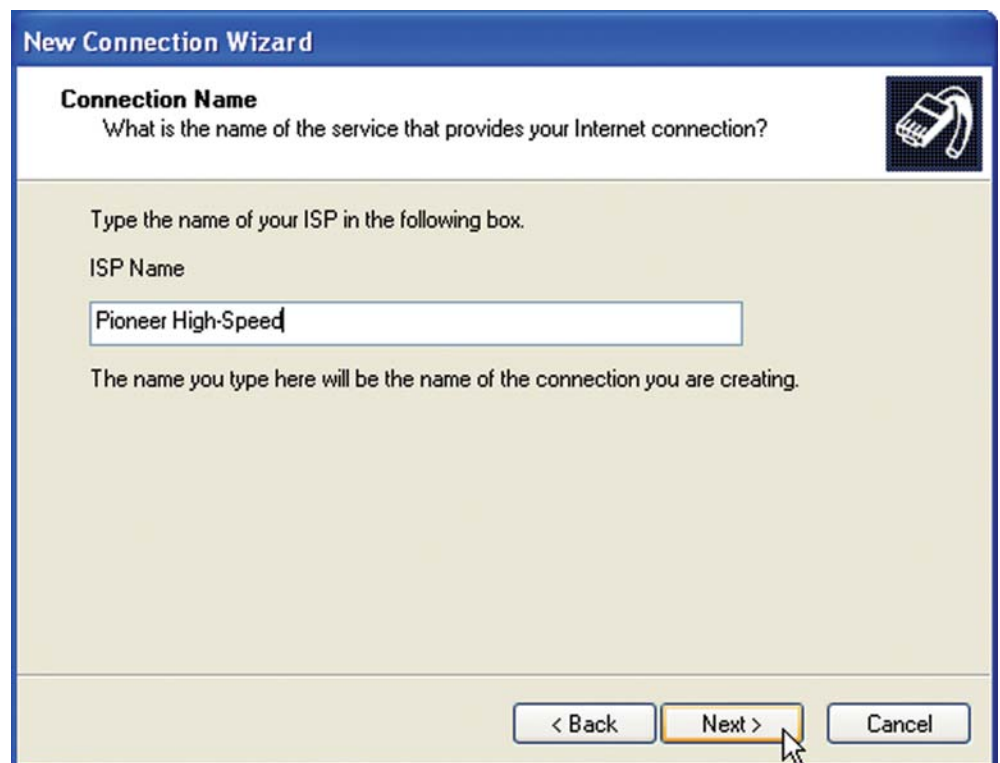

High-Speed Internet set up for Windows XP users

10. On the following screen select **Connect using a broadband connection that requires a user name and password**. Click Next.

The screenshot shows the 'New Connection Wizard' dialog box with the title bar 'New Connection Wizard'. The main heading is 'Internet Connection' with the question 'How do you want to connect to the Internet?'. There are three radio button options: 'Connect using a dial-up modem' (unselected), 'Connect using a broadband connection that requires a user name and password' (selected), and 'Connect using a broadband connection that is always on' (unselected). Each option has a brief description. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. A mouse cursor is pointing at the 'Next >' button.

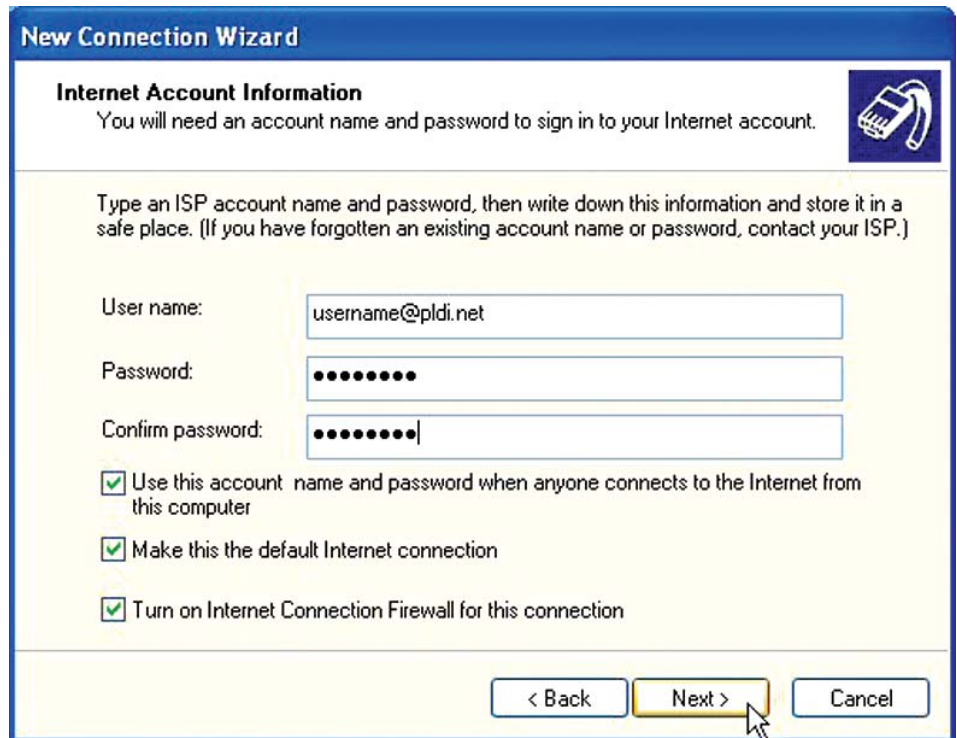

11. On the following screen, type **Pioneer High-Speed** for the ISP Name and click Next.

The screenshot shows the 'New Connection Wizard' dialog box with the title bar 'New Connection Wizard'. The main heading is 'Connection Name' with the question 'What is the name of the service that provides your Internet connection?'. Below this, it says 'Type the name of your ISP in the following box.' and 'ISP Name'. A text input field contains the text 'Pioneer High-Speed'. Below the field, it says 'The name you type here will be the name of the connection you are creating.' At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. A mouse cursor is pointing at the 'Next >' button.

12. On the following screen asking for the Internet Account Information, type in your user name followed by @pldi.net in the **User name** text box, then type in your password in the **Password** text box, and finally type your password in again in the **Confirm password** text box. Click **Next**.

The screenshot shows the 'New Connection Wizard' dialog box with the 'Internet Account Information' step. The title bar reads 'New Connection Wizard'. Below the title bar, the text says 'Internet Account Information' and 'You will need an account name and password to sign in to your Internet account.' There is a small icon of a mobile phone in the top right corner. The main text reads: 'Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)' There are three text input fields: 'User name:' containing 'username@pldi.net', 'Password:' containing seven dots, and 'Confirm password:' containing seven dots. Below the fields are three checked checkboxes: 'Use this account name and password when anyone connects to the Internet from this computer', 'Make this the default Internet connection', and 'Turn on Internet Connection Firewall for this connection'. At the bottom right, there are three buttons: '< Back', 'Next >', and 'Cancel'. A mouse cursor is pointing at the 'Next >' button.

13. On the Completing the New Connection Wizard screen, put a checkmark in **Add a shortcut to this connection to my desktop**, and click **Finish**.

The screenshot shows the 'New Connection Wizard' dialog box with the 'Completing the New Connection Wizard' step. The title bar reads 'New Connection Wizard'. On the left side, there is a large blue globe icon and a smaller icon of a mobile phone. The main text reads: 'Completing the New Connection Wizard' and 'You have successfully completed the steps needed to create the following connection:'. Below this, there is a section titled 'Pioneer High-Speed' with three bullet points: 'Make this the default connection', 'Share with all users of this computer', and 'Use the same user name & password for everyone'. The text continues: 'The connection will be saved in the Network Connections folder.' There is an unchecked checkbox labeled 'Add a shortcut to this connection to my desktop'. At the bottom, it says 'To create the connection and close this wizard, click Finish.' At the bottom right, there are three buttons: '< Back', 'Finish', and 'Cancel'. A mouse cursor is pointing at the 'Finish' button.

High-Speed Internet set up for Windows XP users

14. After the connection has been completed, the following window will appear. To connect to Pioneer High-Speed Internet click **Connect**.

15. There will now be a Pioneer High-Speed Internet icon on the desktop. Double-click this icon to display the Connect Pioneer High-Speed window to reconnect to Pioneer High-Speed Internet.

16. On the Connect Pioneer High-Speed Internet window, click **Connect** to reconnect to Pioneer High-Speed Internet.
